

04-232 would be a very expensive burdensome requirement. Parttime recording won't resolve the problem. If a station is going to air indecent programming they will do so during a time they are not recording. Why should those of us who follow the rules have to follow an imposed burden? Rather...require those who air shock jocks to report it and impose the burden on them or do it to those who have had penalties in the past or whom the public has complained. The rest of us shouldn't have to bear the burden caused by only certain programs or stations.
